

## Description

Stripper 11 is a non-flammable, water risible, thixotropic paint remover, especially designed for stripping various types of paints such as baked enamel, lacquer, varnish, synthetic enamel, zinc chromate primer, epoxies and polyurethanes.

- » **Evaporation:** Stripper 11 has a self-forming surface film which retards evaporation and extends the working life.
- » **Cling:** This product is excellent on all surfaces, vertical or horizontal.
- » **Appearance:** Translucent, viscous yellow liquid.
- » **Corrosion:** Stripper 11 is non-corrosive to aluminum, magnesium, anodized aluminum and ferrous alloys. Stripper 11 will not cause hydrogen embrittlement to high strength steel.
- » **Concentration:** Use as received.

## Specification

This product meets or exceeds all qualifications for the following:

- » MIL-PRF-25134C

## Method of Use

### Application Methods

- » Spray
- » Brush

### Equipment

- » Spray on the stripper with a non-atomizing sprayer. The stripper may also be applied by brush. When a brush is used, daub to give a thick coating.

### Stripping

- » Allow sufficient dwell time for thorough loosening or blistering of the paint. When paint is loosened thoroughly agitate all areas with a stiff brush. If paint is still adhering in some areas, reapply and allow additional time before rinsing.

### Rinsing

- » Crest Stripper 11 and paint residues may be rinsed with high pressure, high volume cold water or with a steam cleaning machine. Slight brushing during the rinse operation insures complete removal of all residues.

## Caution

**Stripper 11 will attack plastics**, therefore, Plexiglas windows should be protected. Also protect rubber window seals and tires. This product contains chlorinated solvents and isopropyl alcohol. It may be fatal or cause blindness if swallowed. Avoid ingestion or prolonged inhalation. Use in well ventilated areas. Avoid contact with skin, eyes, and clothing. Refer to product labels and Safety Data Sheets for precautionary and handling information.
